DETAILED ACTION

The amendment filed May 12, 2003 is acknowledged. Claims 31-35 were canceled.
 Claim 36 is pending and examined on the merits.

Claim Rejections Maintained:

2. The rejection of claim 36 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention is maintained.

Applicant's arguments and the Brunet reference (supplied by applicant with response, Brunet et al, Science, 280: 1455, 1998) have been carefully considered, but fail to persuade. Claim 36 reads on methods of treatment, because the claims contain the active step of administering noggin, and because the specification contemplates therapeutic compositions for use in the clinic to regulate cartilage and bone growth. However, the specification fails to provide teachings or a contemplation of diseases that could be treated, and fails to provide examples of effective doses of noggin. The specification fails to identify any diseases that are associated with a noggin deficiency. Applicant relies on Brunet to demonstrate that a deficiency of noggin (homozygous null mouse) results in skeletal malformation during development. However, this teaching is insufficient to enable one of skill in the art to practice the claimed invention, because the teachings of Brunet are related to the role of noggin during embryonic

Art Unit: 1642

development and tell one of skill in the art nothing with regard to whether noggin would be useful in adult tissues. Currently, there does not appear to be a way for one of skill in the art to predict that a protein having developmental effects will also be effective in the adult. For example, growth hormone is well known to play a vital role during development, but has no regulatory role in the adult. Therefore, for the reasons of record, the rejection is maintained.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the Office should be directed to Anne Holleran, Ph.D. whose telephone number is (703) 308-8892. Examiner Holleran can normally be reached Monday through Friday, 9:30 am to 2:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, Ph.D. can be reached at (703) 308-3995.

Art Unit: 1642

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist at telephone number (703) 308-0196.
